

**Fraser Surrey Docks Celebrates  
the Maiden Voyage of the M/V "Corella Arrow"**

Fraser Surrey Docks was proud to welcome the M/V "Corella Arrow" to the Vancouver Gateway on Wednesday June 10<sup>th</sup>, 2009. To commemorate the maiden voyage of the vessel, Bill Wehnert, VP of Sales and Marketing at Fraser Surrey Docks, presented Captain Ivica Majurec with a plaque onboard the new vessel (as pictured below).

L to R: Capt. Ivica Majurec and Bill Wehnert**

The new vessel, owned and operated by Gearbulk Shipping, arrived at Fraser Surrey Docks carrying over 1,000 metric tons of fabricated steel destined for the Westshore Terminals coal loading facility at Roberts Bank. The cargo is in the form of a pre-fabricated stacker-reclaimer which, when assembled, will be the fourth such machine operating at Westshore Terminals. The stacker-reclaimer will be used to load export coal destined for the world's steel mills. Once operational, the new stacker-reclaimer will increase the terminal's throughput to 29 million metric tons annually. The new 7,000 metric ton per hour stacker-reclaimer was designed and supplied by Sandvik Mining and Construction and fabricated in Korea by Doosan-Mecatec. The unloading at Fraser Surrey Docks included transferring the larger components, weighing as much as 130 metric tons, to a barge for delivery to Westshore, while the smaller components were transferred by truck. The machine is expected to be assembled and ready for work before the end of 2009.

---

The M/V "Corella Arrow" is a general cargo carrier measuring 225 metres in Length Overall. The vessel was completed and delivered to Gearbulk in May of 2009. She has a deadweight tonnage of over 72,863 metric tons and has 2 travelling gantry cranes onboard with a lifting capacity of 70 metric tons each.
